RISMAN

Jakarta, Indonesia (remote) · heyrisman@gmail.com · linkedin.com/in/heyrisman

Professional Summary

Project controller with nine years in telecom infrastructure, now Project Controller Lead at Nokia Indonesia. I track project financials against contract milestones, reconcile progress and acceptance data into revenue figures, and explain variances to engineering and finance teams. On the Lintasarta and Indosat Ooredoo Hutchison projects, tighter issue tracking cut exposure to contract penalties from IDR 11 billion to IDR 800 million. I also write financial-markets content for trading and capital brands, and recently completed an Associate of Science in Computer Science. I am now continuing into the bachelor's program and studying AI and machine learning, so I am comfortable checking structured, numbers-heavy output and writing down why something does or does not hold up.

Project Control & Finance Experience

Nokia Indonesia | Jakarta

Project Controller Lead | 2025 – Present

- Lead project control for DWDM optical transport projects for Lintasarta, from planning through acceptance.
- Process bills of quantities (BoQ) and check quantities and line items against the network plan before they reach commercial review.
- Own project documentation: minutes of meetings, acceptance test records, and RFI tracking.

Project Controller | 2021 – 2024

- Cut potential contract penalties from IDR 11 billion to IDR 800 million by setting up issue tracking and escalating delays before they hit penalty clauses.
- Ran revenue forecasting against provisional and final acceptance milestones (PAC/FAC) and closed the gap between completed acceptance tests and billable PAC.
- Led project control for the Lintasarta and Indosat Ooredoo Hutchison accounts: progress tracking, document submission, and acceptance status.
- Built and reconciled daily, bi-weekly, and monthly progress and revenue reports for Nokia management and the customer.
- Walked engineering teams and the shared service center through financial results and agreed corrective actions when revenue ran behind target.

Nexwave Technologies | Indonesia

Project Controller | 2019 – 2021

- Produced daily and weekly reports that the project team used for scheduling and spend decisions.
- Tracked site verification and acceptance documentation against revenue targets with field engineers.

- Reconciled installed, integrated, and dismantled material against Nokia's plan so inventory and billing matched.

Project Engineer | 2017 – 2019

- Analyzed network KPI reports and drive-test logs to find the causes of dropped calls.
- Carried out site optimization (antenna tilt, azimuth, neighbor lists) to resolve customer complaints.

Programs, Content & Community Experience

Google Arcade Facilitator | Google Cloud | Remote | 2026

- Guide participants through hands-on Google Cloud Skills Boost labs and learning paths in the Google Cloud Arcade program.

Freelance Financial Content Writer | Remote | Ongoing

- Write market commentary, SEO articles, and weekly economic-calendar posts for trading and capital brands.
- Cover forex, CFDs, crypto, and scheduled macro releases such as inflation, rate decisions, and jobs data.

Financial Services Firm | Remote Social Media Manager | 2023 – 2024

- Grew organic reach on X and LinkedIn for a financial services brand using monthly performance data to adjust content.
- Ran the content calendar with the design team and reported on engagement and audience sentiment.

Bondex | Remote Community Specialist | 2023 – 2025

- Managed a community of more than 1 million members through a token listing, keeping users and stakeholders informed at each stage.
- Resolved user questions and technical issues and worked with marketing on announcements.

Web3 Project | Remote Community Specialist | 2024

- Moderated Discord and Telegram channels, hosted AMAs, and passed user feedback to the development team.
